SUMMARY

Software Engineer with 2+ years of experience building full-stack web applications and AI-powered systems. Experienced in Python, FastAPI, React, REST APIs, RAG pipelines, vector search, LLM integration, document processing, and cloud-based application development. Strong foundation in software engineering, backend development, databases, and AI application architecture.

TECHNICAL SKILLS

Languages: Python, JavaScript, SQL

Frontend: React.js, HTML, CSS, Tailwind CSS

Backend: FastAPI, Node.js, Express.js, REST APIs, WebSockets

AI / Machine Learning: LLM Applications, RAG, LangChain, LangGraph, NLP, Prompt Engineering, Semantic Search, Vector Search, FAISS, Ollama

Databases: MongoDB, PostgreSQL, Redis

Cloud / DevOps: AWS (S3, EC2, Lambda), GCP, Docker, Git, CI/CD

Tools: Postman, Playwright

EXPERIENCE

Smarter Codes

Bangalore, Karnataka, India

Full Stack Engineer

Aug 2025 – May 2026

- Designed and developed an AI research engine using Python, FastAPI, vector similarity search reducing document retrieval time by 40%.
- Developed 3+ React UI modules for AI document pipeline monitoring and real-time tracking of 20+ document processing events per day.
- Developed backend APIs and integrated AI services to support document ingestion, retrieval, processing, and user-facing workflows.
- Worked with Docker, Redis, databases, and cloud services to support reliable development and deployment of production applications.

Cogzin Technologies

Siliguri, West Bengal, India

Full Stack Developer

July 2024 – Aug 2025

- Developed and maintained full-stack web applications using React.js, JavaScript, backend APIs, and database-driven workflows.
- Designed and integrated core platform modules including investor profiling, startup listings, recommendation workflows, and analytics dashboards.
- Improved data collection reliability and system integration by optimizing backend processes, reducing data sync errors by 30%.
- Designed and integrated 5+ core platform modules including investor profiling, startup listing, recommendation logic, and analytics visualization.

PROJECTS

DocMind AI [GitHub Link]

Oct 2025 – Dec 2025

- Built an AI-powered document question-answering system that allows users to upload documents and retrieve context-aware answers using natural language queries reducing document search and analysis time by 60%.
- Implemented a RAG pipeline using FAISS for vector search and Ollama for local LLM inference.
- Developed FastAPI backend services and React interfaces with WebSocket-based communication for interactive document processing.
- Technologies:** Python, FastAPI, React, Ollama, RAG, FAISS, WebSockets, MongoDB

AI Amazon Listing Generator [GitHub Link]

Apr 2025 – May 2025

- Built an AI-powered application that generates Amazon product titles, bullet points, descriptions, and advertising content from product information reducing manual listing creation time by 80%.
- Used Llama 3, Ollama, prompt engineering, and SEO-focused generation techniques to automate product content creation.
- Designed the workflow to reduce repetitive manual content creation and generate structured, marketplace-ready product copy.
- Technologies:** Python, Llama 3, Ollama, Prompt Engineering, NLP, SEO

EDUCATION

Indira Gandhi National Open University (IGNOU)
Bachelor of Computer Applications (BCA)

Maidan Garhi, Delhi, India
2022-2025

CERTIFICATIONS

- **Data Science and Machine Learning Assessment** – Demonstrated foundational knowledge of machine learning, data analysis, and predictive modeling workflows.
- **Python Programming and Modern Web Development** – Demonstrated practical knowledge of Python programming, full-stack development, and AI-powered application development.

ACHIEVEMENTS

- Conducted technical interviews and evaluated candidates on problem-solving, and technical fundamentals.
- Awarded “Employee of the Month” for contributions to project delivery and development team performance.
